## **Summary of Changes**

### March 29, 2000 Version 1.0

Initial Release.

July 3,200 Version 1.1 Modified

Notes section NJ Notes section

X12 Structure

Notes on BIG segment

Notes on SAC segments

Notes on DTM segments

Added REF\*OI – Canceled 810 transaction reference number

Changed REF\*11 to optional – ESP's customer account number

Deleted REF\*45 - GDC's previous customer account number

Added REF

DQ - Highest Month Average Daily (HMAD)- added for New Jersey

SJ - Maximum Daily Quantity (MDQ)- added for New Jersey Natural Gas

Deleted Unmetered IT1 loop

Updated all Electric Units of Measurement to Gas Units of Measurements

Updated examples

May 31,2001

Added Table of a Contents

Version 1.2 | Added Data Dictionary

Removed Rate Ready example for Unmetered loop since not valid in NJ

Remove "ELECTRIC" from IT107

June 22, 2001 Version 1.3 Removed Rate and Unmetered notes in under Bill Ready category in the Notes section.

Corrected Billing Information note

Corrected notes "Cancellations" and "Minimum requirements" in Notes section.

Corrected spelling error in SAC15 note.

Corrected Use Note on Segment REF\*11 (ESP Account Number)

### August 8, 2001 Version 1.4

### For PSE&G CAS

Updates NJ Notes section

- Added PID loop note in Data Dictionary
- Updated NJ Use note on segment BAL\*P\*YB
- Updated NJ Use note on segment BAL\*M\*J9
- Added segment PID in IT1 Account Loop

#### November 7, 2001 Version 1.5

Added South Jersey Gas Example

March 8, 2002

Version 1.6

Added Elizabethtown notes to Notes sections:

o "Cancellations"

- o "Bill Ready LDC Consolidated Billing Supplier Switch"
- o "Bill Ready Missed Window:"

### February 23, 2012 Version 1.7

### For SJG:

- Updated Notes section to indicate SJG supports LDC Rate Ready and remove references to SJG under LDC Bill Ready
- Update BIG segment Notes to remove reference to SJG
- Updated DTM150 and DTM151 segment Notes to remove reference to SJG
- Updated SAC04 to remove reference to SJG
- Updated SAC15 SJG to remove "Specifications need to be developed"
- Updated IT1 loop note to remove reference to SJG indicating Rate loop invalid
- Removed Bill Ready example

### April 16, 2012 Version 1.8

### For PSE&G

- New Jersey Notes Bill Ready Missed Window: changed LAST 810 received to FIRST 810 received.
- Updated DTM 150 and DTM 151 segment Notes from PSE&G will NOT validate this field to PSE&G will validate this field.
- PSE&G Bill Ready Example changed 10 digit LDC account number to 20 character alpha numeric PODid number
- PSE&G Bill Ready Example updated PSE&G gas DUNS number from 006973812 to 006973812GASP

### April 23, 2012 Version 1.9

### For Elizabethtown Gas Co

- 810 LDC Consolidated Billing
  - o ETG has currently not developed a LDC consolidated billing capability

### October 4, 2012

Updated SAC09 value to be TD, consistent with 867 QTY03. Per Change Control submitted 7/3/12. Change effective 10/15/2012.

### April 8, 2013

### **Revised Version**

 Updated Notes to indicate ETG will be supporting consolidated billing by end of 2013

### September 9, 2014

#### For PSE&G

• New Jersey Notes - Minimum Requirements – Segments Used for Bill Presentation: updated to state adjustments are added together.

#### For ETG

 Updated Notes to indicate ETG now supports LDC Consolidated Bill Ready billing with details of practices. Added examples.

### December 15, 2014

### For PSE&G

• Updated note in SAC section to indicate transactions with multiple adjustment lines will be rejected.

# Notes

LDC Definitions:	The term GDC (Gas Distribution Company) in this document refers to the utility.
ESP Definitions:	The term ESP (Energy Service Provider) in this document refers to the supplier.
General Notes	<ul> <li>This document is used to define the requirements of the LDC Consolidated Bills which can be used for two purposes:</li> <li>Sent by LDC to ESP – Used when the LDC calculates the ESP charges, based on the rates provided by the ESP to the LDC. This is referred to as Rate Ready billing.</li> <li>Sent by ESP to LDC – Used when the ESP calculates their own charges and the charges print on an LDC consolidated bill. This is referred to as Bill Ready billing.</li> <li>Note: ESP Consolidated Bills will be defined in a separate 810 Implementation Guide.</li> </ul>
IT1 Loop	<ul> <li>The IT1 is used to indicate whether the charge/tax is at a rate level, account level, or unmetered level. In New Jersey for Bill Ready, charges will always be sent at the account level.</li> <li>IT109 = "ACCOUNT" for billing information that pertains to the entire account.</li> <li>Account Loop may contain all charges and taxes for the customer's account, e.g., Customer Account Charge, Meter Charge, State Sales Tax, County Tax and generation charges.</li> <li>Account Loop may be used in Rate Ready LDC Consolidated Billing and may contain just account level charges and all taxes, e.g. Customer Account Charge, Meter Charge, State Sales Tax and County Tax, with generation charges itemized in the Rate Loop (IT109=RATE) and/or Unmetered Loop (IT109=UNMET).</li> <li>Account Loop is used in Bill Ready LDC Consolidated Billing and will all account charges and including all generation charges.</li> <li>Bill Ready and Rate Ready data examples at the end of this guide illustrate how to use the Account loop.</li> <li>IT109 = "RATE" when billing information is being provided at a Rate level.</li> </ul>
Rate Ready – Single IT1 Loop	<ul> <li>Rate Loop may be used for Rate Ready LDC Consolidated Billing</li> <li>Companies doing Rate Ready billing using only a single IT1 ACCOUNT Loop will not be required to provide the ESP Rate Code (REF*RB) since that code is provided in the RATE</li> </ul>
Bill Ready – Sequencing Numbers	<ul> <li>Print sequencing numbers must be unique and sequential within each 810. If print sequencing numbers are not unique and sequential, the billing party will determine the order on the bill (i.e., the 810 will not be rejected because the sequencing numbers are not unique). Not used by PSE&amp;G</li> <li>ETG will use the print sequence numbers to organize the bill print messages.</li> </ul>
Budget Billing: Rate Ready Consolidated Billing	<ul> <li>The <u>Actual</u> charges will be coded with their appropriate code ("A" = Allowance, "C" = Charge, or "N" = No Allowance or Charge) in the SAC01. SAC02 will be set to F950. SAC04 will be set to the appropriate value. The actual charge will be in SAC05.</li> <li>The <u>Budget</u> Amount information will be SAC02 = H151, SAC01 = N, SAC04 = BUD001. The actual charge will be in SAC05.</li> </ul>
Late Payment Charges: Rate Ready	<ul> <li>Late payment charges that the utility applies to the supplier charges must be sent on an 810 transaction. Inclusion of the charges on an 810 indicate an actual assessment of the late payment charges for the previous billing period indicating the customer did not pay the ESP charges in full by the previous billing period due date.</li> </ul>
Cancellation Scenarios: Rate Ready	<ul> <li>The prior 810 will be sent (you must cancel by billing period), however, it is not necessary to include the BAL segments in Rate Ready LDC Consolidated Billing scenario.</li> <li>The values will be identical in sign to what they were on the original bill. The way to indicate the bill is being reversed is through the use of the BIG08 field - value "01".</li> <li>If the LDC does an off-cycle cancel, the 810 cancellation must be sent before the rebill.</li> <li>The rebill will always be coded as an original (BIG08 - "00")</li> </ul>

### Cancellation Scenarios: Bill Ready – Directly Related to Usage

Depending on whether a GDC is maintaining the suppliers' balance, cancellation scenarios may not be necessary.

### **LDC Consolidated with LDC Meter Read:**

- 1. The 867 cancellation from the LDC will inform the ESP that the billing (810) and usage (867) information is cancelled.
  - 1. The 810 cancellation from the ESP to the LDC is optional Day 1. The issue of whether an LDC will process this information will be revisited at a later date.

### Bill Ready Scenarios - ESP Cancels 810 Not Related to Usage

These scenarios differ by utility and are documented within the state sections.

# **New Jersey Notes**

Billing Information:	PSE&G - Supports Bill Ready.
	<ul> <li>New Jersey Natural Gas – Supports Rate Ready.</li> </ul>
	South Jersey Gas – Supports Rate Ready.
	Elizabethtown Gas - Supports Bill Ready.
Calculating Previous Unpaid Balance	<ul> <li>For Rate Ready, the billing party has the responsibility of calculating the previous unpaid balance.</li> </ul>
1	<ul> <li>For Bill Ready, each utility determined whether they would be maintaining the previous unpaid balance.</li> </ul>
	<ul> <li>PSE&amp;G is making the TPS whole and thus will maintain the supplier previous unpaid balance as part of PSE&amp;G's unpaid balance.</li> </ul>
	• ETG maintains the supplier previously unpaid balance. As part of POR, ETG maintains the full customer balance on the account.
Processing Bill Ready Data	<ul> <li>PSE&amp;G presents supplier charges on its bill that are included within the first 810 processed by PSE&amp;G, that was received within the bill window.</li> </ul>
	• ETGs bill heading section provides for two lines of aggregated supplier charges – a debit and/or a credit. A supplier can detail the components of their charges in the bill messaging section. (Billing Window- The ESP has a 32 hour billing window to return an 810.)
Cancellations due to	LDC Consolidated with LDC Meter Read:
usage:	• PSE&G - The 867 will automatically cancel the ESP's 810 charges. The ESP should not send a cancel 810.
	• ETG will send an 867 cancellation to a TPS. The supplier will be required to send back an 810 cancellation.
	• ETG will cancel an account based on how the account is billed. ETG will issue separate EDI 867s upon bill cancellation.
Cancellations not directly related to usage:	PSE&G - Supplier must determine what value to place in next 810. PSE&G will ignore an 810 cancel.
	<ul> <li>ETG- Will accept 810 cancellations (credits), the BIG08 must equal 01 for an 810 cancellation. The 810 cancellation can be sent outside of the billing window if the</li> </ul>
	customer is disputing the TPS charge and this invoice will be added to the next printed bill.
Bill Ready – LDC Consolidated Billing	The following outlines the rules each Bill Ready Utility has when there is a supplier switch and the previous ESP misses the billing window.
- Supplier Switch	<ul> <li>PSE&amp;G – The supplier will be responsible for collection of any outstanding funds due from the customer. If supplier misses bill window on a switch, PSE&amp;G will NOT print original supplier charges on the next bill.</li> </ul>
	<ul> <li>ETG- ESP is responsible for billing any charges that are not sent, if the billing window is missed for an account that is switching.</li> </ul>
Bill Ready - Missed	Each utility has distinct rules on how a missed bill window will be handled:
Window:	<ul> <li>PSE&amp;G – will NOT hold charges. The suppliers next month's 810 should include charges for any missed bill windows. PSE&amp;G will only use the LAST 810 received in the Bill Window for charges.</li> </ul>
	• ETG will not accept charges received after the billing window closes. If this occurs, the TPS will be required to send a missed charge in a subsequent billing period. ETG will however accept multiple 810s while the billing window is open. If a supplier misses a billing window
	and no TPS charge is billed, a notation will appear on the bill that the TPS charge is not included.

### Minimum requirements:

Each LDC may allow different fields to be passed. The minimum fields that must be on a New Jersey bill are:

PSEG will use the following segments for Bill presentation:

Adjustment - SAC05 where SAC04=ADJ000, IT1 loop=ACCOUNT (optional) adjustments must not include payments.

Current Charge - SAC05 where SAC04=GEN004, IT1 loop=ACCOUNT (must send) Only one Current Charge per 810 is expected.

If additional Current Charges are sent the last Current Charge received in the 810 will be processed.

Total Charge - BAL\*M\*YB (must send) Total Charge Due must equal the sum of Adjustment and Current Charge.

Note: PSE&G will print any PID records up to 60 chars, in length and up to 50 PID loops. PSE&G will ignore any SAC record with SAC04=ADJ002 and also ignores the SAC15.

If an ESP is certified for LDC Consolidated Billing, PSE&G will print the following seven items on the PSE&G Bill.

- 1. ESP Name
- 2. ESP phone number
- 3. ESP Logo (if ESP is certified for printing Logo)
- 4. Current Charge
- 5. Adjustment
- 6. Total charge (must equal the sum of Adjustment and Current Charge)
- 7. One Rolling Page containing up to 50 lines of text each containing up to 60 characters

Note: Items 1-3 above are not sent via EDI810 but are provided earlier.

## ESP Price on Residential Customer

New Jersey regulations require the ESP's price for the energy charge be printed on the LDC's consolidated customer invoice for residential customers (C&I optional). To meet this requirement, the following applies to the bill ready LDCs:

PSE&G – the ESP must send the charge description in the PID segment to include the price (rate) of the energy charge. PSE&G does not support the use of the SAC15. Any information sent in the SAC15 will not be printed on the customer's consolidated invoice.

Each LDC may allow different fields to be passed. The minimum fields that must be on a New Jersey bill are:

PSE&G will use the following segments for Bill presentation:

Adjustment - SAC05 where SAC04=ADJ000, IT1 loop=ACCOUNT (optional) adjustments must not include payments.

Current Charge - SAC05 where SAC04=GEN004, IT1 loop=ACCOUNT (must send) Only one Current Charge per 810 is expected.

If additional Current Charges are sent the last Current Charge received in the 810 will be processed.

Total Charge - BAL\*M\*YB (must send) Total Charge Due must equal the sum of Adjustment and Current Charge.

Note: PSE&G will print any PID records up to 80 chars. in length and up to 6 PID loops. PSE&G will ignore any SAC record with SAC04=ADJ002 and also ignores the SAC15. Recheck this-

If an ESP is certified for LDC Consolidated Billing, PSE&G will print the following seven items on the PSE&G Bill.

- 1. ESP Name
- 2. ESP phone number
- 3. ESP Logo (if ESP is certified for printing Logo)
- 4. Current Charge

# (Bill Ready)

- 5. Adjustment
- 6. Total charge (must equal the sum of Adjustment and Current Charge)
- 7. One Rolling Page containing up to 6 lines of text each containing up to 80 characters

Note: Items 1-3 above are not sent via EDI810 but are provided earlier.

ETG – Bill Presentation ESP Charges: Only one of the following will be accepted per 810 Current Charges (Debit)

BIG08- Original (00)

TDS01- Amount

Adjustments (Credit)

BIG08- Cancellation (01)

TDS01- Amount

Once an ESP is certified for LDC consolidated billing with ETG, the following items will be displayed on the ETG bill.

- 1) ESP Name \*
- 2) ESP Phone Number \*
- 3) ESP Logo \*
- 4) Current Charge
- 5) Adjustments
- 6) Bill Messaging- Each printed bill will contain a maximum of six lines of text no longer than 80 characters in length.

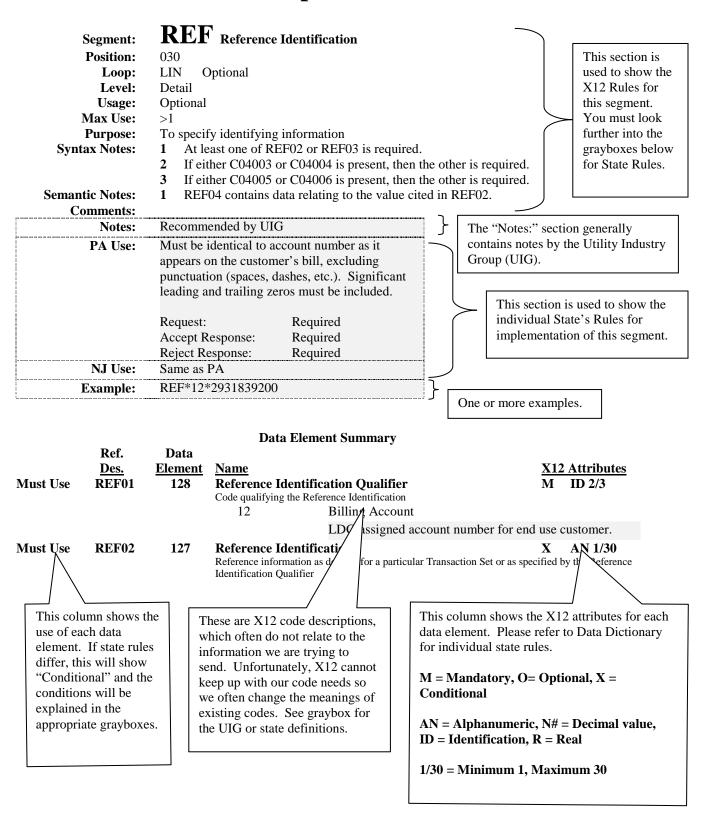

Note (\*) The first three items are not sent via the EDI 810 but must be provided at time of registration.

ETG will support up to six PID05 with a maximum of 80 characters when PID06= R1. The first PID loop is for residential customers and must contain the ESP price for the energy charge. ETG will also support the R1 for sequence number and this will be used to organize the messaging on the ETG consolidated bill.

Budget Billing

Example charge description: ENERGY CHARGE-100 THERM@0.8391 PER THERM Budget Billing for the supplier portion of the bill is not provided on a Utility Consolidated Bill.

## How to Use the Implementation Guideline

# **Data Dictionary for 810 LDC Consolidated Bill**

Appl Field	Field Name	Description	EDI Segment	Related EDI Qualifier	Data Type
		HEADER LEVEL BILL INI	FORMATI	ON	
1.	Bill Date	Date Bill was issued. For Bill Ready Scenarios, this will be the date the bill was created. For Rate Ready Scenarios, this will be the date the bill was issued.	BIG01		9(8)
2.	Bill Number	Unique Number identifying this Bill	BIG02		X(22)
3.	Cross Reference Number	The cross reference number originally transmitted in the 867 in the BPT02.	BIG05		X(30)
4.	Bill Action Code	"FE" - Memorandum, Final Bill Customer account has finaled with the LDC. "ME" - Memorandum	BIG07		X(2)
5.	Bill Purpose	"00" - Original "01" - Cancellation - Cancels an entire Bill "07" - Duplicate - For change of due date only.	BIG08		X(2)
6.	Original Bill Number	The Bill Number (BIG02) from the Original 810 when sending a cancellation Bill.	REF02	BIG08=01 or 17 REF01 = "OI"	X(30)
7.	ESP Account Number	Customer Account Number assigned by ESP	REF02	REF01 = "11"	X(30)
8.	LDC Account Number	LDC Customer Account Number	REF02	REF01 = "12"	X(30)
9.	Billing Cycle	Cycle on which the bill will be rendered. Cycle associated with account.	REF02	REF01 = "BF"	X(2)
10.	Billing Type	Indicates the party that delivers the bill to the end use customer - LDC consolidated Billing (REF02="LDC")	REF02	REF01 = "BLT"	X(3)
11.	Billing Calculation Method	Indicates party to calculate bill LDC calculates bill (REF02 = "LDC") - Each calculates their own portion (REF02 = "DUAL")		REF01 = "PC"	X(4)
12.	LDC Name	LDC's Name	N102	N101 = "8S"	X(60)
13.	LDC Duns	LDC's DUNS Number or DUNS+4 Number	N104	N101 = "8S"	X(13)

14.	ESP Name	ESP's Name	N102	N101 = "SJ"	X(60)
15.	ESP Duns	ESP's DUNS Number or DUNS+4 Number	N104	N101 = "SJ"	X(13)
16.	Customer Name	Customer Name	N102	N101 = "8R"	X(35) Note: X(60) for MD
17.	Store Number	Number assigned by and meaningful to the customer.	N104	N101 = "8R" N103 = "92"	X(20)
18.	Due Date	Payment Due Date for Rate Ready only			9(8)
19.	Balance as a Result of Last Billing	Balance of previous period charges prior to applying payments and adjustments for the previous period billing.	BAL03	BAL01 = "P" BAL02 = "YB"	-9(13).99 Explicit Decimal
20.	Balance Prior to Current Billing	This is the balance prior to this billing. If a customer is paid in total, this will be zero.	BAL03	BAL01 = "M" BAL02 = "J9"	-9(13).99 Explicit Decimal
21.	Current Balance	Customer total outstanding balance (previous balance plus current charges)	BAL03	BAL01 = "M" BAL02 = "YB"	-9(13).99 Explicit Decimal
ACCOU	NT Level IT1	Loop (Used for Charges that are s	ummarized	l by Account)	
22.	Line Item Number	Sequential Line Item Counter	IT101		9(20)
23.	Service	Indicates type of service. Will always reflect GAS	IT107	IT106 = "SV"	X(8)
24.	Category of Charge	ACCOUNT - Indicates charges are summarized at an Account level.	IT109	IT108 = "C3"	X(7)
25.	Тах Туре	Account Level Taxes - Please see EDI Guideline for valid values.	TXI01		X(2)
		thin the ACCOUNT Level IT1 Lo SE&G, up to 6 times for ETG)	op (The PI	D loop may be 1	repeated up to
26.	PID Description	Text description for charges or as supporting text	PID05	$PID01 = \mathbf{F}$ $PID03 = \mathbf{EU}$	X(80)
27.	PID Description Type	Indicates relative print location on bill R1 – Text Supporting Current Charges R2 – Additional Supporting Text	PID06		X(2)
28.	Number	Determines relative placement of text on bill	PID07		9(2)
	END of PID L	OOP			
29.	Service Period Start	Service Period Starting Date	DTM02	DTM01 = "150"	X(8)
	End	Service Period Ending Date	DTM02	DTM01 = "151"	X(8)
31.	Subline Counter	Sequential Charge Line Item Counter. This segment is used for ANSI purposes and has no relevance in the application system.	SLN01	SLN03 = "A"	9(20)

	Allowance or	"A" - Allowance (Credit to the customer)	SAC01		X(1)
J2.	Charge	"C" - Charge	Detail		$\Lambda(1)$
	Indicator	"N" - No Charge or Allowance; should be	Position 230		
22		printed but ignored when summing the total	G A G02		<b>37/4</b> )
33.	Charge	Used to differentiate Rate Ready	SAC02		X(4)
	Calculation	vs. Bill Ready and Actual Charges			
	Determinant	vs. Budget Billed. Please see EDI			
		guideline for valid codes.			
34.	Energy		SAC04	SAC03="EU"	X(10)

# 810 Invoice

## Functional Group ID=

### **Introduction:**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Invoice Transaction Set (810) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the billing for goods and services provided.

### **Transaction Set Notes**

1. Number of line items (CTT01) is the accumulation of the number of IT1 segments. If used, hash total (CTT02) is the sum of the value of quantities invoiced (IT102) for each IT1 segment.

Segment: ST Transaction Set Header

**Position:** 010

Loop:

Level: Heading Usage: Mandatory

Max Use:

**Purpose:** To indicate the start of a transaction set and to assign a control number

**Comments:** 

**Business Rules:** Variable Name: STST

Notes: NJ Use: Required

Example: ST\*810\*00000001

M	Ref. Des. ST01	Data Element 143	Name Transaction Set Identifier Code	Attr M	ributes ID 3/3
			Code uniquely identifying a Transaction Set 810 Invoice		
M	ST02	329	Transaction Set Control Number	$\mathbf{M}$	AN 4/9
			Identifying control number that must be unique within the tra functional group assigned by the originator for a transaction		ion set

Segment: BIG Beginning Segment for Invoice

**Position:** 020

Loop:

Level: Heading Usage: Mandatory

Max Use:

**Purpose:** To indicate the beginning of an invoice transaction set and transmit identifying numbers

and dates

**Comments:** 1 BIG07 is used only to further define the type of invoice when needed.

Notes: NJ Use: Required

Note:

PSE&G will only process transactions with BIG08="00" PSE&G will reject with transaction 824 if BIG05 not provided

ETG will process transactions with BIG08-"00 and 01" only ETG will reject with transaction 824 if BIG05 is not provided

ETG only supports BIG07 = ME

Example: BIG\*20120201\*20120201123500001\*\*\*2048392934504\*\*ME\*00

	Ref.	Data				
3.5	Des.	Element	Name Date			ributes
M	BIG01	373	Date		M	<b>DT 8/8</b>
				as CCYYMMDD		
			Date the bill wa	is issued (rate ready) or created (bill ready).

0	BIG07	640	must be sent in <b>Transaction Ty</b>	=====	0	ID 2/2
U	DIGUT	040		· <del>-</del>	U	11) 2/2
				g the type of transaction		
			FE	Memorandum, Final Bill		
				This is to designate this is the final usage for this customer. Customer account has	_	_
				utility or the customer has switched	15 11116	area with the
				Mandatory for Rate Ready Billing		
			) (T			
3.5.77	DIGO	252	ME	Memorandum		TD 4/4
M/U	BIG08	353		et Purpose Code	O	ID 2/2
			•	g purpose of transaction set		
			00	Original		
			01	Cancellation		
				Cancels an entire invoice		
				not supported by PSEG.		
			07	Duplicate		

This code will be used only in a Rate Ready scenario when the LDC changes the bill due date for the customer. The LDC will send an 810 to the ESP, the only things changing from the original 810 are the duplicate code and the due date.

PSE&G will not use

### PSE&G and ETG will not use

17 Cancel, to be Reissued

Reversal – used when 810 cancellation is not related to usage. (Bill Ready only)

### PSE&G & ETG will not use

18 Reissue

Used in combination with code 17 – Reversal, to re-bill the charges that were previously reversed. (Bill Ready only)

### PSE&G and ETG will not use

**Position:** 050

Loop:

Level: Heading Usage: Optional Max Use: 12

Segment: IT1 Baseline Item Data (Invoice)

**Position:** 010

Loop: IT1 Optional

Level: Detail
Usage: Optional

Max Use:

**Purpose:** To specify the basic and most frequently used line item data for the invoice and related

transactions

**Comments:** 

1 Element 235/234 combinations should be interpreted to include products and/or services. See the Data Dictionary for a complete list of IDs.

2 IT106 through IT125 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

**Notes:** 

ACCOUNT: Used to convey charges that apply to the entire account.

Note: If tax is the only information conveyed in this loop, the SLN and SAC segments

should not be sent.

Note: IT1 loops may be sent in any order. There may only be ONE IT1 ACCOUNT Loop

NJ Use: This loop is required to identify whether this is an electric or gas

transaction. The ACCOUNT loop is the only one used for Bill Ready.

Examples: IT1\*1\*\*\*\*\*SV\*GAS\*C3\*ACCOUNT

Segment: PID Product/Item Description

**Position:** 060

Loop: PID Optional

Level: Detail Usage: Optional

Max Use:

**Purpose:** To describe a product or process in coded or free-form format **Comments:** 1 If PID01 equals "F", then PID05 is used. If PID01 equals

- 1 If PID01 equals "F", then PID05 is used. If PID01 equals "S", then PID04 is used. If PID01 equals "X", then both PID04 and PID05 are used.
- 2 Use PID06 when necessary to refer to the product surface or layer being described in the segment.
- 3 PID07 specifies the individual code list of the agency specified in PID03.

**Notes:** Notes: Used to provide required IT1 level billing messages.

NJ Use:

Not used In Rate Ready

Conditionally available by utility in Bill Ready:

- PSE&G Required to convey the TPS price on the consolidated customer bill for residential customers, C&I optional. See New Jersey Notes Section)
- PSE&G will support up to 60 chars in PID05 when PID06=R1 or R2 and PSE&G will support up to 50 PID loops
- ETG will support up to six PID05 with a maximum of 80 characters when PID06= R1. The first PID loop is for residential customers and must contain the ESP price for the energy charge. ETG will also support the R1 for sequence number and this will be used to organize the messaging on the ETG consolidated bill.

Example:

PID\*F\*\*EU\*\* ENERGY CHARGE-60KWH@0.099833 PER KWH \*R1\*01

Segment: SLN Subline Item Detail

**Position:** 200

Loop: SLN Optional

Level: Detail Usage: Optional

Max Use:

**Purpose:** To specify product subline detail item data

**Comments:** 1 See the Data Element Dictionary for a complete list of IDs.

2 SLN01 is related to (but not necessarily equivalent to) the baseline item number. Example: 1.1 or 1A might be used as a subline number to relate to baseline number 1.

3 SLN09 through SLN28 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

Notes: Notes: The IT1/SLN segment (Position 200) is used to overcome the limitation of

25 IT1/SAC loops (Position 180). Each SLN loop will only contain one SAC. Multiple

charges/allowances require multiple SLN loops.

NJ Use: Required if sending any SAC segments

Example: SLN\*1\*\*A

	Ref.	Data			
	Des.	<b>Element</b>	<u>Name</u>	Attı	<u>ributes</u>
M	SLN01	350	<b>Assigned Identification</b>	$\mathbf{M}$	AN 1/20
			Alphanumeric characters assigned for differentiation within	a tran	saction set
			Used as a loop counter		
M	SLN03	662	Relationship Code	M	ID 1/1
			Code indicating the relationship between entities		
			A Add		

Segment: SAC Service, Promotion, Allowance, or Charge Information

**Position:** 230

Loop: SLN Optional

Level: Detail
Usage: Optional
Max Use: 25

**Purpose:** To request or identify a service, promotion, allowance, or charge; to specify the amount

or percentage for the service, promotion, allowance, or charge

#### **Comments:**

- 1 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.
- 2 In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to as "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" Dollars in SAC09.

#### Notes:

Notes: Each SLN loop will contain only one SLN and one SAC. Multiple charges/allowances require multiple SLN loops.

NJ Use: Required

SAC08, 09, 10, 13, 15 are conditional, they must be provided if the charge in the SAC05 is based on a rate. The SAC05 is mandatory in all cases.

Note: SAC03/SAC04 are only used for Rate Ready.

Bill Ready: PSE&G: SAC01, 02, 03, 04, 05 are required. PSE&G does not print information sent in the SAC15, uses PID segment. (See New Jersey Notes section). PSE&G will reject 810 transactions with multiple adjustment lines (ADJ000) in the SAC segment.

SAC04 values: In addition to being used for Rate Ready, some utilities may require this in Bill Ready to distinguish charges:

PSE&G - SAC04 is required. ADJ000, GEN004 are valid values.

Bill Ready: ETG- will accept SAC01, 02, 03, 04 and 05 but not process or validate

Bill Ready:

Segment: TDS Total Monetary Value Summary

**Position:** 010

Loop:

Level: Summary Usage: Mandatory

Max Use:

**Purpose:** To specify the total invoice discounts and amounts

**Comments:** 1 TDS02 is required if the dollar value subject to discount is not equal to the dollar

value of TDS01.

**Notes:** TDS01 is the total amount due for this invoice and must equal the algebraic sum of the amounts in the TXI02 and SAC05 segments with the exception of any charges

that are designated to be ignored in the calculation in the TXI07 or SAC01. If this

amount is negative, send the minus sign.

NJ Use: Required - The TDS will be the sum of all of the SAC lines. It will not necessarily equal the total charges sent for the current month. For instance, any adjustments sent in Bill Ready for PSE&G will be included in the TDS.

ETG- This should equal the sum of the current charges. ETG will not validating the summing of multiple SAC05 lines. The TDS01 amount is what will be used to print on the consolidated bill. ETG will maintain the ESP previous balance. A negative debit charge is not acceptable, only credits can be negative.

Example: TDS\*10000 Note: This represents \$100.00 - there is an

implied decimal.
